SAVE ENERGY - SAVE MONEY

Compressed air can be confusing but it does not need to be. **Premiair** has earned a reputation for excellence in all fields of compressed air generation whilst providing expert, professional advice.

Put simply and straightforward, we can save you energy & money.

ENGINEERING EXCELLENCE

HPC Compressors are engineered to last & feature energy efficient **EFF1/WIMES motors** that meet or exceed the energy

efficiency criteria required to be eligible for **Enhanced Capital Allowances (ECA's)**.

INTEREST FREE LOANS

You may also qualify for an **unsecured interest free loan** allowing you to invest in HPC compressed air equipment and **reduce your energy bills now** rather than waiting until your own funds or budgets are available or allow.

Contact Premiair for further details.

**Save Energy &
Save Money with an
INTEREST FREE LOAN**

Dear Compressed Air User

How would you like to get some money back from the Government?

...believe it or not, it could be easier than you think

A Government backed scheme allows companies to purchase new energy efficient HPC compressed air equipment **now** rather than waiting until your own funds are available or budgets allow.

A Carbon Trust Energy Efficient Loan is available to eligible small and medium sized organisations who can apply for loans of between £5,000 and £100,000, **UNSECURED** for up to 4 years (please contact HPC for full details and advice).

The term of the loan is determined by the energy payback but, in simple terms, the Carbon Trust will loan money on an **INTEREST FREE** basis to those companies that are actively looking to reduce their energy bills by purchasing new energy efficient equipment.

Premiair will gladly assist you in discussing, investigating and advising on the equipment and energy saving options available to you before completing a straightforward loan application form. Providing a complete application is received, a decision can usually be made in about 2 weeks.

The loan would be paid directly into your company's account ready to pay the bill for the cost of equipment and installation without having to draw on your own funds. A very important benefit is that **the new energy efficient equipment starts to reduce energy bills immediately** and, in addition, **you can also claim Enhanced Capital Allowances** and so achieve further savings.

Energy efficiency, quite simply, makes economic sense. Companies find that even **a modest investment in energy saving projects and equipment can reduce power bills by 20%**. Once the savings exceed the capital amount, they can go straight to the bottom line. Realistically this can happen in as little as twelve months.

For further information or to discuss your requirements **contact Premiair** on:

Telephone: **0871 200 1286** or Email: **ask@premiair.co.uk**

Yours sincerely,

Paul Adams
Managing Director
